Windows Vista *Clear & Concise Training*

By Clear Canyon

Microsoft has developed a confusing set of classes for the Windows Vista platform, which overlap and contain marketing and fluff. We have streamlined the courses so that the fluff is gone and what remains is the ***Clear & Concise Training, CCT***, you need. The ***CCT*** for Windows Vista is comprised of two classes:

Windows Vista Support

Windows Vista Deployment & Application Compatibility.

Microsoft also deploys these courses using Virtual Machines running on Windows XP. Although we will use the VMs we will also install the full Vista product (Ultimate Edition) on "real" machines. All of our Machines are capable of running the full Vista Experience therefore you and your staff will gain the best in hands on training-real world labs!

Windows Vista Support We designed this course from 3 Microsoft courses (5115, 5116 & 5118). This course includes Installation, Configuration, Support, & Networking, boiling 8 days of training into 5 full technical ***Clear & Concise Training*** days. This class is ideal for all support personnel.

Windows Vista Deployment & Application Compatibility This is an advanced course for 2nd and 3rd tier support personnel who deploy vista to multiple machines and troubleshoot application compatibility on Vista desktops. This course is derived from Microsoft courses 5119, 5105, 5371 & 5373 taking 5.5 days of training and producing 4 days of the advanced ***Clear & Concise Training*** you need.

Click the course number links in blue below to visit the Microsoft Learning site and read/review each course description.

Windows Vista Support

[Course 5115: Installing and Configuring the Windows Vista Operating System](#)

[Course 5116: Configuring Windows Vista Mobile Computing and Applications](#)

[Course 5118: Maintaining and Troubleshooting Windows Vista Computers](#)
